

Present a training seminar

# Green Streets In San Diego

TUESDAY  
**AUGUST**  
**14**

**Green Streets continue to increase in popularity, and the local San Diego region has seen its fair share of implementation in recent years.**

This seminar will highlight local Green Street projects which have been successfully implemented. Some have been used for typical MS4 permit compliance with new public roadway projects, some have been the result of grant-funded retrofit projects to improve water quality for the surrounding drainage area, and others have been constructed to meet requirements for private development projects. With the latest PDP exemptions for redevelopment of existing paved streets (in accordance with the US EPA Municipal Handbook for Green Streets), there continues to be ample opportunity and demand to implement Green Street elements.

**This seminar will cover the following:**

- Completed Green Streets in San Diego
- County of San Diego Green Street Standard Drawings
- Preliminary Design Examples using County of San Diego Green Street Standard Drawings
- PDP Exempt Green Street Projects

**Speakers include:**

- County of San Diego, Charles Mohrlock
- Port of San Diego, Ernie Medina
- City of La Mesa, Joe Kuhn
- City of Temecula, Stu Kuhn
- Meridian Development, Todd Galarneau
- support from various design professionals
